YOUR PERSONAL LIFE MANAGER

LIFE ADMIN AI

"Turn your documents into decisions."

TEAM ARYABYTES

Kuwar Vishwajeet Singh • Adima Agarwal • Utkarsh Pratap Singh • Vishakha Singh

The "Chaos"

Scenario

"Meet Aryan. It’s 11 PM. He just found out via a meme in the class group that the Exam Form portal closes at midnight. He has to find his 10th-grade marksheet, his fee receipt from 4 months ago, and a specific ID number—all buried in 5,000 unorganized photos."

The Pain

Aryan misses his "Exam Form" deadline because the notification was a physical paper he forgot to photograph. He now faces a **₹2,000 late fee**.

Life is Messy. Your Schedule Shouldn't Be.

- **Missing things** is our habit nowadays.
- **Manual tracking** is prone to human error.
- Important deadlines are buried in **unstructured formats** (images, PDFs, long emails).
- **Mental load:** We spend more time remembering tasks than doing them.

The Real Issue

"People don't fail because they are lazy; they fail because the 'Administrative Burden' of modern life has exceeded human memory."

Core Message: Information is everywhere, but Action is nowhere.

Beyond Scanning: Proactive Life Management

The Vision

An AI-powered "Command Center" for your personal life.

The Fix: It doesn't just store files; it reads them, understands the urgency, and reminds you before it's too late. Life Admin AI isn't a storage app like Google Drive. It's an Action app.

Scan

Extract

Remind

Automate

Intelligence Behind Every Image

Smart OCR

Instant extraction of dates, tasks, and vital information from any uploaded image or PDF document.

Contextual Reminders

Not just a basic "ping," but a comprehensive "What/Where/When" alert that gives full context.

Future Stress Detector

A visual "Heatmap" showing you that next Tuesday is overloaded, prompting you to act today.

Auto-Categorization

Intelligently sorts all incoming data into distinct Academic, Personal, or Financial buckets.

Aryan’s New Reality

Scenario

Aryan uses Life Admin AI. He snaps a photo of that exact same messy notice board.

The Result

The AI instantly pings him: "Exam Form detected. Deadline: Tomorrow 10 AM. I’ve added this to your calendar and flagged your Fee Receipt in your 'Downloads' folder."

Outcome

"Aryan sleeps better. No late fees. No panic."

See Your Week at a Glance, Not a Panic.

Step 1: Input

User seamlessly uploads an unstructured Image or PDF notice.

Step 2: Processing

Tesseract OCR combined with intelligent Text Parsing Logic.

Step 3: Categorize

AI sorts parsed data into "Bill," "Academic," or "Personal."

Step 4: Output

Dashboard card generation, Calendar Sync, and Push Notification.

The Engine Under the Hood

Frontend

React / React Native

Backend

Node.js (API Layer)
Python (AI Processing)

AI Stack

Tesseract OCR / Google Vision API
OpenAI GPT / Claude

Database

MongoDB
(Optional) Pinecone (vector search)

Integrations

Firebase (Notifications)
Twilio (WhatsApp), Google Calendar

Deployment

Vercel + Render

The Edge: Why We Stand Out

Criteria	Life Admin AI ★	Traditional To-Do Lists	Cloud Storage (Drive)
Input Method	Automated (OCR & AI)	Manual Typing	Manual File Upload
Actionability	High (Auto-reminders)	Low (Static text tasks)	None (Static file holding)
Core Focus	Mental Health & Stress Reduction	Basic Task Productivity	File Archival & Sharing
Categorization	Automatic & Contextual	Manual Tagging	Manual Folders

Target Audience

Students

Never miss exam forms, assignment deadlines, or hostel mess bills again.

Professionals

Stay effortlessly on top of credit card bills, insurance renewals, and rent agreements.

Households

Easily track warranty cards, AMC services, and recurring utility bills.

Patients

Manage medical checkups, treatments, and time-sensitive medicine requirements seamlessly.

Roadmap: The Path to Autonomy

Phase 1

WhatsApp Bot

Forward a photo, instantly get a scheduled task.

Phase 2

Email Scraper

Auto-detect Zomato & Electric bills from inbox.

Phase 3

Autonomous Payments

Deep-linking directly to secure UPI apps.

The Vision

"We aren't just an app; we're an entire proactive productivity ecosystem."

Questions?

"We aren't just building a scanner; we are giving people back their peace of mind."

Ask us about our Stress Detection algorithm!
